

Nestlé Purina PetCare is the second largest company in the pet food industry. In order to leverage the high potential of **Nestlé Purina PetCare Europe** and achieve our ambitious Market Business Strategy objectives, we are currently looking for a:

PACKAGING SPECIALIST TRAINEE

MISSION:

- Manage and/or coordinate development, implementation, performance and maintenance of selected pet food packaging for NPPE.
- Serve as the packaging interface with groups including marketing, research, production facilities, QA, product supply, regulatory, purchasing and others within technical services.

PRINCIPAL RESPONSIBILITIES:

- Develop, maintain and ensure the consistent performance of packages, which will require a) the generation of packaging solutions, b) production qualification of facilities through in-plant testing, c) packaging implementation management, and d) ensure/monitor final quality, packaging performance, shelf-life, and consumer response.
- Lead /coordinate the timely development/improvement of existing or new packages and major line extensions from concept through production.
- Work closely with R&D on new packaging solutions and line extensions to ensure efficient, timely implementation of product/process/packages.
- Renovate existing packaging systems based upon various company needs/requirements, which include initiatives from QA, regulatory, purchasing, production, marketing, and R&D.
- Collaborate with Marketing and R&D on packaging initiatives, which include establishing project priorities, timing and costs for brand initiatives.
- Safeguard the Company's designs, processes, and reputation in all matters.

QUALIFICATIONS REQUIRED:

- Master degree in Packaging / Materials.
- Previous experience in packaging (food or pet-food is preferred).
- Flexibility to travel and relocate anywhere in Europe.
- English required, a second language would be a strong asset.
