

*Completion of the first IPI Master Study Program*

## **First Master Graduation Ceremony at IPI International Packaging Institute in Neuhausen**

*There was a jubilant atmosphere during the ceremony awarding the first masters degrees at IPI International Packaging Institute in Neuhausen am Rheinflall.*

On January 22nd 2010 the first six Master Study participants received their Master degree. The minister of the department of education of the state of Schaffhausen – Ms. Rosmarie Widmer Gysel - welcomed the proud graduates and around 30 guests to the festive ceremony. She was very delighted about the first graduates and underlined the importance of the IPI International Packaging Institute supporting the packaging companies in the area and bringing added value to the region.

Prof. Dr. Ingo Büren, IPI Scientific Director looked back on the foundation of IPI in 2004, the start of this Master study program in 2006 and the big effort of all the involved leading to the first success being celebrated with this graduation ceremony. Prof. Dr. Bernd Wilke, Head of the IPI Scientific Board and Head of Technology at Bosch Packaging, reminded everyone about the importance of qualified employees and lifelong learning. He concludes that the IPI's Master study program with its part time concept, the width of the subjects and the English tuition language fits to the requirements of the packaging industry.

### **Presentation of Master Thesis and Award of Diplomas**

The well known packaging design expert Lars Wallentin reminded the graduates in his humorous speech to use humor and creativity in daily business by showing success stories of creative packaging design. Afterwards the six graduates presented their Master Thesis. The subjects ranged from designing packaging equipment, optimizing maintenance, packaging design to business ethic and demonstrated the quality and width of this Master Study program.

Roland Luxemburger, Director Continuing Education Department at the University of Applied Science Constance, praised the commitment of the participants during the intensive study period. He awarded, as the representative of IPI's university partner for the Master program, the diplomas to the six graduates.

**The subjects of the Master thesis:**

*Peter Braun, Cilag, Schweiz:*

Development & Implementation of a „Combination Product Hybrid System”

*Alessandro Galata, Tetra Pak Italien:*

Systems Engineering discipline to develop a Final Folder Module

*Markus Hochuli, Wander AG: Cultrue and Business Ethics in Saudi Arabia and Switzerland*

*Stefan Kraft, Tetra Pak Schweden:*

Research & Development and the Challenge to Industrialize Efficiently
